

**PERCENT PROPORTION**

For each of the following situations identify the **Part (P)**, **Whole (W)**, and **Percentage (%)** and fill in the Percent Proportion. Then turn the page over and find the missing amount.

<p>1. What number is 20% of 70?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>	<p>2. 15 is what percent of 25?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>
<p>3. 16 is 40% of what number?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>	<p>4. What is 40% of 80?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>
<p>5. What number is 70% of 90?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>	<p>6. 35 is 40% of what number?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>
<p>7. 24 is what percent of 36?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>	<p>8. 20 is 80% of what number?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>
<p>9. What is 65% of 120?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>	<p>10. 24 is what percent of 85?</p> <p>Part = _____ = <math>\frac{\quad}{100}</math></p> <p>Whole = _____</p> <p>Percentage = _____</p>

<p>1. What number is 20% of 70?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$	<p>2. 15 is what percent of 25?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$
<p>3. 16 is 40% of what number?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$	<p>4. What is 40% of 80?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$
<p>5. What number is 70% of 90?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$	<p>6. 35 is 40% of what number?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$
<p>7. 24 is what percent of 36?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$	<p>8. 20 is 80% of what number?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$
<p>9. What is 65% of 120?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$	<p>10. 24 is what percent of 85?</p> $\frac{\quad}{\quad} = \frac{\quad}{100}$
