

Hello AGGIES – I am not at school today because I've gone to Southern California to see my mother who is still in the hospital.

1. Today your lesson is to continue working on fractions.
    - a. You will start with a Math Antics video on how Fractions Are Division and do some practice.
    - b. Next you will watch the video on Dividing Fractions and then do some more practice.
- Whatever you don't finish in class needs to be finished tonight.
  - You can check your answers to the problems on the website.
  - Tomorrow the guest teacher will answer any questions you have and then collect the two pages.

Thanks for being on your best behavior for the guest teacher!
