AGGIES – Here is what's planned for class today:

- First you will be discussing your homework with the guest teacher. You should have already checked the answers in the back to see which ones you got correct. This is your opportunity to ask questions about the ones you couldn't figure out.
- After discussing the homework, you will be working on some problems to see how well you understand Multiplying and Dividing Fractions.
 - You will start by having 15 minutes to work on the problems by yourself.
 - Next you will have about 15 minutes to discuss the problems with the rest of the people in your group. This your chance to get some help on any problems you didn't understand. (And to help with questions others didn't get.)
 - At the end of the time you will hold on to the page; you will be discussing it in class tomorrow.
- If there is time left at the end of the period, you can start working on tonight's Fraction Multiplication practice.

By the way – I know some of you like to switch up groups when we have a guest teacher. I've left the teacher a note asking her to make sure you stay in your regular groups. Please don't make things difficult for her by asking to switch groups.

– Also for today, no gum chewing or eating in class. The guest teacher is asked to follow the regular Redwood school rules and I don't want to make it difficult for her by changing those rules. I'm sure you can go without gum for today.

Thanks for helping make this a great day for the guest teacher and all your classmates. 🙌
