

Hello AGGIES – I’m at a meeting today and you have a guest teacher. Please make sure you sit in your assigned seats. Make sure you personally do everything you can to make today feel respectful and enjoyable for the guest teacher.

- The guest teacher will be passing out the **Lesson 5 – Graph Proportional Relationships** packet. The packet has both today’s class practice, **Reteach**, and the **Homework practice**. Please put your name, date, and period information at the top of both papers.
- You will need a ruler for the practice. If you don’t have your own ruler get one from the TA or the guest teacher. Remember that using the ruler allows you to produce higher quality work and takes very little extra time.
- You have the full period to work on the four graphing problems from the **Reteach** and **Skills Practice** page. Whatever you do not finish becomes part of their homework.
- When you finish the **Reteach** and **Skills Practice** page you can start work on the homework.
- I have posted the answers to all the problems on the website. Please check your work **AFTER** you finish each page.
- If you finish all the practice before the end of the period you should read a “dead tree” book .

I’m sure class will go well; however, I’ve left the following for the guest teacher in case there are any problems:

Student _____ **Date** _____ **Period** _____

Unfortunately, this student’s disruptive behavior has reached a level where it is difficult for the guest teacher to carry out Mr. Willmarth’s lesson plan with the rest of the class. Please keep the student in the office for the remainder of the period. Mr. Willmarth will have a conversation with the student and Ms. Montgomery tomorrow and together they will decide on any additional consequences.

Thank you – M. Willmarth
