

Lesson plan notes for Math 7 on Tuesday, November 28

These are the notes I have left for the guest teacher:

Periods 2, 5 and 6

Today students will be studying ***Mixed Numbers***.

1. Students will begin by watching a lesson video on this topic. The link to the video is in today's agenda. Students should have the agenda website (mwillmarth.org/math7) bookmarked on their devices. **Encourage students to turn on Closed Caption while watching the lesson video.**
2. ***Students who do not bring a Chromebook ready to use (not charged enough to complete the work during this class) period need to fill out the form I left and work with a partner if the partner is willing. There are no longer loaner Chromebooks.***
3. There is also a link to the practice exercises in the agenda for students who are absent today; students who are in class will get the page of practice problems from the TA in the back of the classroom after they have finished the video.
4. Students should take out their spiral notebooks so they can take notes during the video.
5. Students will need earbuds/headphones for the video. If they do not have earbuds/headphones please have go back to the TA desk to get one of the pairs loaned by Mr. O'Toole. Please ask the TA to make sure there are 12 pairs in the box at the end of each period.
6. After students finish the video they should start on the number line practice page and then the Home practice. There are two stacks of papers at the TA desk and they are labeled as to which to do first. Students should take one of each.
7. If they finish the number line practice page and Home practice students should work on the five Dreambox lessons they have for this week.
